

What is My NMIT?

My NMIT is an account you can create on our website to manage your applications and personal details.

Currently, you can only create an account when you apply online. We are working on enabling anyone (whether you applied online or not) to be able to create an account.

Once you [Sign in to My NMIT](#) you can do the following:

- View and update your personal details - your identity details, home and postal addresses, contact details, emergency contacts.
- View all current and history applications and enrolments with their status
- Secure your enrolment - confirm your intention to study and accept your offer (this only shows if your application is at that stage)
