

How do I deactivate Generative AI in Grammarly?

Paul Devine - 2024-08-16 - Moodle

Please note: if you are using Educational Grammarly provided by NMIT, Generative AI has already been deactivated.

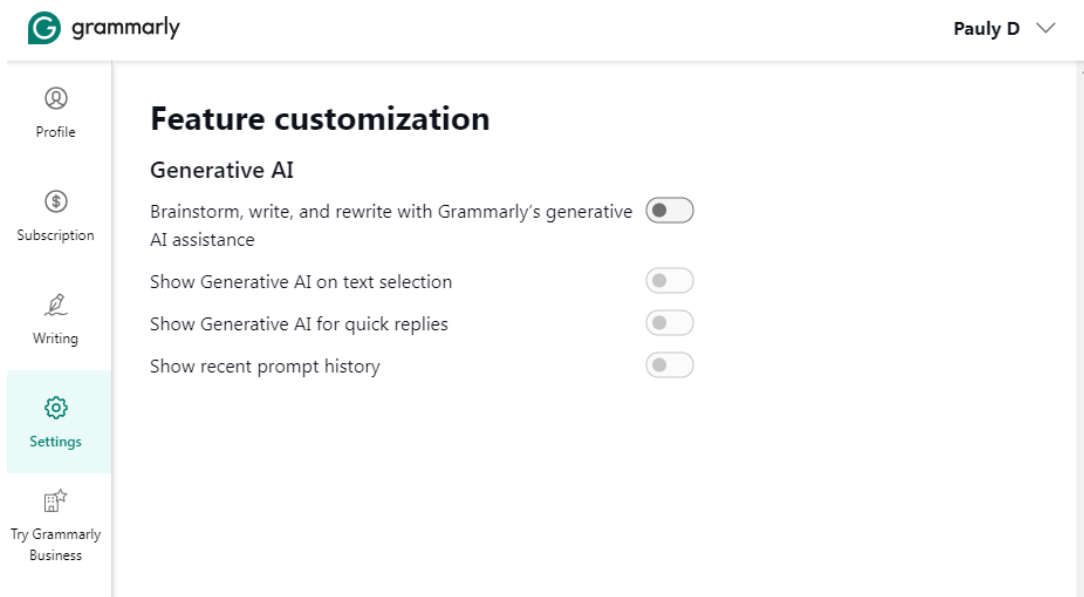

To deactivate Generative AI in Grammarly:

1. Go to MyGrammarly > Account > Settings > Feature customisation:

The screenshot shows the Grammarly user interface. At the top left is the Grammarly logo, and at the top right is the user name "Pauly D" with a dropdown arrow. On the left is a navigation sidebar with icons for Profile, Subscription, Writing, Settings (highlighted in light blue), and Try Grammarly Business. The main content area is titled "Feature customization" and has a sub-section "Generative AI". It lists three features, each with a green toggle switch that is turned on (indicated by a white checkmark): "Brainstorm, write, and rewrite with Grammarly's generative AI assistance", "Show Generative AI on text selection", "Show Generative AI for quick replies", and "Show recent prompt history".

2. Toggle Generative AI Features to off:

This screenshot is identical to the one above, showing the same Grammarly settings page. However, in this version, the three Generative AI features are turned off. The toggle switches are now grey and have a grey circle on the left side, indicating they are disabled. The features listed are: "Brainstorm, write, and rewrite with Grammarly's generative AI assistance", "Show Generative AI on text selection", "Show Generative AI for quick replies", and "Show recent prompt history".
