

How do I deactivate Generative AI in Grammarly?

Paul Devine - 2024-08-16 - Moodle

Please note: if you are using Educational Grammarly provided by NMIT, Generative AI has already been deactivated.

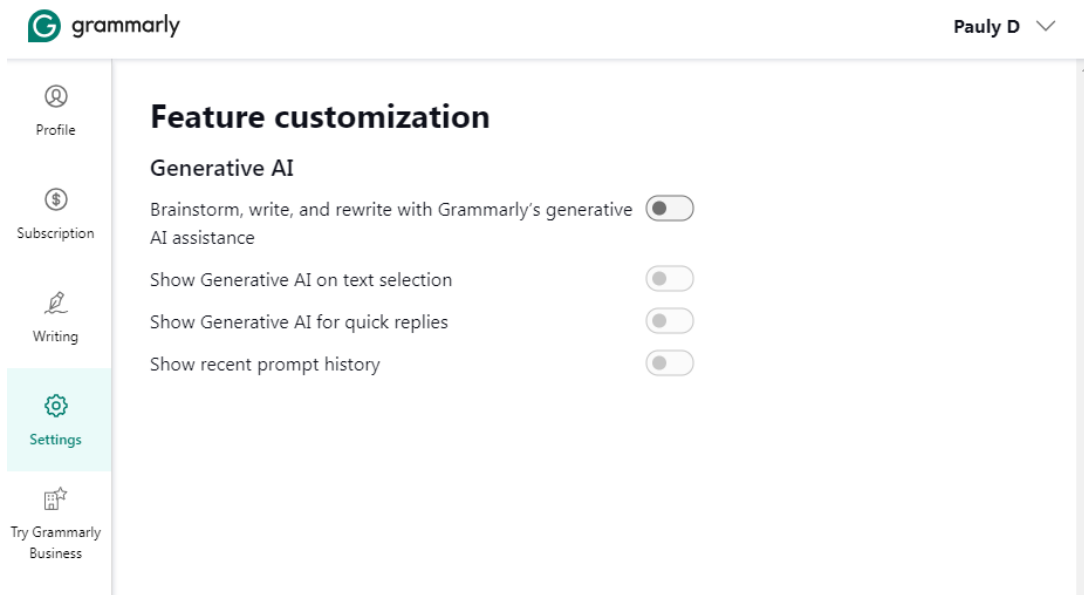

To deactivate Generative AI in Grammarly:

1. Go to MyGrammarly > Account > Settings > Feature customisation:

The screenshot shows the Grammarly user interface. At the top left is the Grammarly logo and the name 'grammarly'. At the top right is the user name 'Pauly D' with a dropdown arrow. On the left is a navigation sidebar with icons for Profile, Subscription, Writing, Settings (highlighted in light blue), and Try Grammarly Business. The main content area is titled 'Feature customization' and has a sub-section 'Generative AI'. It lists three features, each with a green toggle switch that is turned on (indicated by a white checkmark): 'Brainstorm, write, and rewrite with Grammarly's generative AI assistance', 'Show Generative AI on text selection', and 'Show Generative AI for quick replies'. A third feature, 'Show recent prompt history', also has a green toggle switch turned on.

2. Toggle Generative AI Features to off:

The screenshot shows the same Grammarly user interface as above. The 'Generative AI' sub-section now shows three features, each with a grey toggle switch that is turned off (indicated by a grey circle on the left): 'Brainstorm, write, and rewrite with Grammarly's generative AI assistance', 'Show Generative AI on text selection', and 'Show Generative AI for quick replies'. The 'Show recent prompt history' feature also has a grey toggle switch turned off.
