How do I search the library research databases?

Below is a selection of database tutorials (2-3 min videos) from some of our more popular databases.

For further assistance, also check out the help guides in each individual database. Or contact us to make a time for a one to one research session.

ProQuest (multi-subject)

View a selection of tutorials using this very popular multi-subject database.

Ebsco databases
Australia & NZ Reference Centre, Cinahl (Nursing), Greenfile (Environmental), Masterfile (Multi-Subject), SportDiscus (Fitness/Sport Science)

Basic Search using Ebsco databases (2.25 min).

Advanced Search (Single Find) using Ebsco databases (3 min).

Advanced Search (Guided Style) using Ebsco databases (3 min).

Cite your article using Ebsco databases (2.16 min). Shows how to easily access the correct citation format (e.g. APA Referencing) for a particular article.

General OneFile (multi-subject)

General Onefile database simple search (3.14 mins)- created by HCPL (Harris County Public Library). Demonstrates a basic keyword search + some search limiters and tool functions.

How to find an article in General Onefile (3.46 mins)- created by Lansing Community College Library. Demonstrates keyword searching in the Advanced Search. It will show you how to search the database, access articles, and make use of other limiters and tool functions.
