

## How do we use your location on our website?

We think it is important that you get the right information provided to you first time, for this reason we have tailored our website to serve accurate programme content based on where you are located.

When you first arrive on our website we undertake a reverse lookup of your IP address ([what's this?](#)) and use a third party service to get a pretty good idea on which country you are located. We then use this to automatically set one of the following location options;

### **New Zealand (Domestic)**

- You are located in New Zealand and,
- If you are a citizen or resident class visa holder of New Zealand or Australia

### **Global**

- You are located in any other country

You can also change your location to;

### **New Zealand (International)**

- You are located in New Zealand and,
- If you are **not** a citizen or resident class visa holder of New Zealand or Australia

### **What does it change when I visit the website?**

We use the selected location to tailor this information:

- Website promotions
- Homepage video
- Related news
- Available programmes
- Supporting programme overview and factsheet download content
- Locations and start dates
- Fees
- Ability to apply
- Contact details

This means that depending on your location you may not see all of the programmes we offer as they are not available in your country.

### **How do I change my location?**

You can use the location tab at the top of our website to change your location at any point.

A screenshot of a website navigation menu. The menu is displayed over a background image of people in a meeting. The menu items are as follows:

- New Zealand (Domestic)** with a globe icon and an upward arrow.
- Global**
- New Zealand (International)**
- LEARN MORE** with a question mark icon.
