

There are so many readings to do each week, I need to speed up. Is there a more effective way?

You are not alone. In the beginning students sometimes struggle to read everything assigned, but with a few reading strategies in place, you'll be up to speed in no time.

Learner Services will help you develop more skills so you better understand the text you are reading, such as:

- recognising pivotal words
- understanding your text book or article structure
- knowing when to speed up and slow down (varying your reading rate)
- assist you in breaking bad habits that get in the way of your reading.
