

I can't set a MyNMIT password

Olly - 2019-04-12 - Create an account

As part of the **MyNMIT** create an account process, after you confirm your email you are taken to a page to set a new password.

This page displays the password criteria that your phrase must match in order to be accepted.

All of the criteria must be satisfied, **especially the last point for data breaches**. If you are having difficulty with completing this item, then we suggest you make your password more complex as by adding a special character or symbol.

Try entering the password you wish to use on this website <https://haveibeenpwned.com/Passwords> . If the page turns red, you will not be able to use it and it is recommended that you change this on any other website that you may also use it. Learn more about [data breaches](#).

You will not be able to proceed until all the grey dashes turn green.

Create an account

 **Megan, thanks for verifying your email**
To finish your sign up please create a password.

 **Set a password**

Password

Confirm Password

Your password must:

- The confirmed password matches the password.
- Be at least 8 characters
- Include an upper case letter
- Include a lower case letter
- Include a number
- Not contain 3 consecutive letters from your email address e.g. jimmy cannot use jim, mmy, etc.
- Not been found in any known [data breaches](#).

 **Current status:**
This is different to your NMIT Office 365 account password and that will not be changed.

Once all the grey dashes have turned green the final button **Set password** will turn blue and you can successfully submit. Only then will you have set the password and will have completed the process.

You will then be taken to a success page and can sign in to **MyNMIT** using your email address and newly set password.
