What is an LNAAT assessment?

Sharon Thomas - 2026-03-05 - [Study and learning](#)

The Literacy & Numeracy for Adults Assessment Training Tool (LNAAT) is a diagnostic tool that provides a way for tutors to identify your skills in reading and/or math and/or listening, and then, accommodate any identified learning needs, and track your progression.

The Tertiary Education Commission (TEC) requires NMIT to ensure:

- All students enrolled in Level 1-3 courses and programmes complete initial and progress LNAAT assessments for reading and/or numeracy.
- ESOL and supported training/vocational studies students complete Starting Points assessments for reading and/or listening.
