

What is my temporary password?

Olly - 2020-04-21 - Using campus computers & printers

If you are a new student at NMIT you will be given a network account. To access and use the features of this account you will first need to activate it.

Part of this is entering a temporary password which has been set up for you and is in the following format:

[StudentID][your initials - first name (or preferred) initial as a capital and lastname initial as lowercase]

Example default passwords:

1. If your student ID is six to eight digits in length: e.g. 12345678 and your name is John Smith, then your default password would be; 12345678Js
2. If however, your student ID is only five digits e.g. 12345 and your name is John Smith, then your default password will have an extra zero; 123450Js
3. If your student ID is only four digits e.g. 1234 and your name is John Smith, then your default password would have an extra two zeros; 123400Js

Your student ID is printed on your *Confirmation of Enrolment* letter, however if you are unable to locate it then please contact us on 03 539 5068 and we will be able to provide it to you.
