

## When I finish my course can I still access Office 365?

When you finish your current course your NMIT login will be kept alive one month after your course finish date.

For this month you can access the NMIT network and services including Office 365.

This will give you enough time to make a backup of all your files stored in OneDrive.

However, if you re-enrol during that month, your account will be kept alive along with your Office 365 access
